

BEN HAMMERSLEY

INTRODUCTION

Ben Hammersley is the founder of Hammersley Futures, an international strategic forecasting consultancy. His work, as a Futurist for clients from the UK Government to Hollywood studios, rests on a bed of technical expertise mixed with eclectic experience: Ben is the author of five books, a former editor of WIRED magazine, the writer and presenter of the BBC series “Cybercrime with Ben Hammersley”, a war correspondent in Afghanistan and Beirut, a pilot, a wilderness medic, and the inventor of numerous technical standards, and, though he hates to mention it, the word “Podcast”.

Please welcome...Mr. Ben Hammersley.
