

In 2004, **Jill Buck** founded Buck Consulting, which helps businesses achieve profitability through sustainability. She teaches business leaders how to quantify ESG (Environmental, Social, and Governance) initiatives in order to meet reporting standards for third party ratings like the Global Reporting Initiative, as well as the Dow Jones Sustainability Index and the NASDAQ Global Sustainability Index. Jill's proven techniques help businesses drive revenue up and costs down through environmentally responsible business practices, and her training is applicable across all industry sectors.

Jill is a global thought leader in sustainable business systems. In August 2007, she was invited to serve on the International Appraisal Committee for the Daonong Center for Enterprise, a think tank formed by the China Entrepreneur Club. Jill was one of the VIP speakers for the 1st Green Business Summit in Beijing on Earth Day 2008, and has given training sessions in sustainable business practices at numerous conferences in China since that time. Jill serves as a Strategic Advisor for the Joint U.S. China Cooperative on Clean Energy (JUCCE).

Jill is an international featured speaker at business, public policy, political, and environmental conventions, and is one of the nation's leading advocates of free market solutions for environmental protection issues. Jill has been featured in such publications as U.S. Mayor, Working Mother Magazine, Women's Health Magazine, Ebony Magazine, Diablo Magazine's "Women to Watch", Cleveland Business Connects Magazine, and Supermarket News.

Jill is the host of "Go Green Radio," a weekly program on the U.S.'s largest internet talk radio station, <http://www.voiceamerica.com/show/1303/go-green-radio>.

## Testimonials

“Jill was the most single knowledgeable interviewer I've ever encountered. I thought I'd just provide here the description she wrote to introduce her listeners to the show, as well as the remarkably astute questions she asked. This show runs far better than a Swiss watch. The engineer who made this all happen was amazing. "This show is about getting at the truth. It's not about posturing or advocating for a cause merely out of ignorance of the opposing point's perspective. It's about asking big, bold, irreverent questions, in this case: What precisely will happen if we move to renewable energy? Who will benefit? Who will lose? Jill wants to explore the good and the bad, the holy and the heretical. In a phrase, she asks her guests to "bring it on." To steal (and then bastardize) a phrase from one of my favorite movies, "A Few Good Men" I leave you with this: "She can HANDLE the truth." ”

- Editor of 2GreenEnergy.

“Jill Buck's thought-provoking keynote address was a highlight at the 2013 Power and Energy Conference at Illinois. An enthusiastic and engaging speaker, Jill kept us thinking and talking about energy policy long after her talk ended.”
