

Katie Linendoll shatters the mold of the typical on-air tech personality. In a few short years, she's earned recognition as a go-to technology expert for CNN and CBS, an Emmy-winning producer on ESPN's SportsCenter and the Emmy-nominated host A&E's We Mean Business. Sometimes referred to as the "Chic Geek", Katie has thousands of hours of live television experience and is also known being a "onestop shop" for networks. She researches, develops and co-produces many of her own segments to create an entertainment experience that's always intelligent, quirky, accessible and unique.

It comes as no surprise that Katie's been enamored with science and technology for as long as she can remember. By the age of 14, she had taught herself how to write sophisticated programs and build computers from scratch. At 18, she held a certificate in computer networking and was enrolled at the Rochester Institute of Technology. She went on to earn a degree in Information Technology New Media, and was recently honored with the 2011 distinguished alumni award at RIT. The last year of Katie's life has been one of the most exciting. For starters, she became one of the few people in the world to challenge the IBM supercomputer Watson at Jeopardy. She also worked alongside Lady Gaga as spokesperson and presenter for Polaroid at CES. Additional promo work included an appearance in a series of Lincoln commercials/webisodes, which gained traction online and also on in-flight screens across the country. Currently, Katie continues contribute to the CBS The Early Show and CNN Newsroom, discussing everything from the politics of internet privacy to the hottest new consumer electronics. She's also the resident tech expert for The Nate Berkus Show. Katie has show...
