

After experiencing a personal tragedy in losing his two-year-old daughter Emily to a medication error, **Chris Jerry** has dedicated his life's work to finding technologies and best practices that can prevent all types of medication errors from happening to others. Since 2006, he has worked tirelessly, engaged with leading medical technology innovators, as well as with healthcare providers from around the world, discovering healthcare solutions proven to save lives. Chris has participated in countless healthcare-focused meetings, medical conferences, and events. He has also given CME and CE accredited lectures and presentations at many prestigious medical facilities across the nation.
