

Hailed as an expert on the future of travel, technology and urbanism by *The New York Times*, *The Wall Street Journal* and CNN, **Greg Lindsay**, is a journalist, futurist and established authority on globalization and innovation. Described as “intellectually stimulating and thought-provoking,” the two-time Jeopardy! champion (and only human to go undefeated against IBM’s Watson) has been invited to share his insights at the Aspen Ideas Festival, the U.S. State Department and with several Fortune 100 companies, including Google, Intel, Boeing and FedEx. His upcoming book, *Engineering Serendipity* is anticipated to delve into how innovative organizations are harnessing social networks and developing new ways of working to cultivate new ideas, inspire collaboration and spur employee engagement and innovation.

With more than a decade of writing and research on globalization, urbanism, innovation and adaptability, Lindsay has produced groundbreaking insight featured in leading outlets, including *Harvard Business Review*, *Bloomberg Business*, *McKinsey Quarterly*, *World Policy Journal*, and on NPR and the BBC.

Lindsay is the director of the Emergent Cities Project at the World Policy Institute, a visiting scholar at NYU and a contributing writer for Fast Company. He received critical acclaim as co-author of *Aerotropolis: The Way We’ll Live Next*, hailed as an essential guide to the 21st century.

Recognized for his sharp intelligence, quick wit and brilliant perspective, Lindsay engages audiences with mind-blowing insights on globalization, offering fascinating visions of our interconnected future, the potential challenges and opportunities, and unique perspectives on everything from ...
