

Hailed the “New Einstein” by her fans, and named the “Modern Day Hidden Figure” by People Magazine and Newsweek, **Olympia LePoint** is a former NASA rocket scientist, award-winning author and TED speaker of the talk “Reprogramming Your Brain to Overcome Fear.” Olympia LePoint helped launch 28 NASA Space Shuttle Missions into space. She grew up in South Central Los Angeles, California in poverty mid inner city trauma and failing grades. Despite her horrific challenges, she reprogrammed her brain for success and graduated as 1 of the Top 5 graduates from California State University Northridge with degrees in Applied Mathematics. She later helped launch NASA missions to space as an award-winning propulsion scientist.

A science entertainer and TV news personality with over 28 million views today, Olympia LePoint is author of the Answers Unleashed® educational science book series and founder the STEM educational platform AnswersUnleashed.com, a platform where science and faith meet to help you find the answers in front of you. She appears as a guest expert on ABC News, CBS News, NBC News, MSNBC News, The Doctors, KTLA Morning News, Good Day LA Morning News, FOX News, Scripps News, Cheddar News, and FOX Weather. She is a professional keynote speaker for schools, corporations, non-profits and technology forums.

With advanced degrees in mathematics, LePoint is preparing the world for a future of technology and ethical discernment. LePoint teaches as an adjunct Artificial Intelligence Research & Political Science Professor at California State University Northridge in the College of Social and Behavioral Sciences. She provides insights on the growing concerns regarding U.S. civil rights and artificial intelligence algorithm usage with fake videos ...
