

BERTRAND PICCARD - Be a Pioneer in your Life: Around the World in a Solar Airplane.

Exploration to change the World

With each of their great "firsts", the adventurers of the last century constantly pushed back the limits of the impossible. Today, the drive to make new discoveries must go on, with the aim of improving the quality of life on our planet. On July 26, 2016 Bertrand Piccard completed the mission of flying around the globe in a Solar Airplane!

By writing the next pages in aviation history with solar energy, and voyaging around the world without fuel or pollution, Solar Impulse's ambition is for the world of exploration and innovation to contribute to the cause of renewable energies, to demonstrate the importance of clean technologies for sustainable development; and to place dreams and emotions back at the heart of scientific adventure.

By going beyond the question of energy, Solar Impulse would also like to encourage each and every one of us to become pioneers in our own lives, in our ways of thinking and behaving.

Around the World in a Balloon

After his round-the-world flight with the balloon, **Dr. Bertrand Piccard** became a sought-after speaker both by the public and by big companies who invite him to address their management, employees or clients.

He knows that his audience isn't there to learn how to fly a balloon, but rather to find in his experience a source of inspiration for their private or professional lives.

Using his aerial exploits as a backdrop, Bertrand Piccard illustrates his concept of the psychology of life, human communication, team-work, motivation, pioneering spirit, as well as how to...
