

JON CARMICHAEL

INTRODUCTION

I am delighted to introduce our speaker today. Jon Carmichael is a world-renowned astrophotographer whose breathtaking images and riveting adventures have captivated and inspired audiences around the world.

Jon gained international acclaim for his extraordinary project, '108,' where he spent years plotting how to capture the historic Great American Eclipse in a unique way, from 39,000 feet. USA Today and Good Morning America claim it could be the best photo of an eclipse ever achieved and one of history's most amazing photographs.

Throughout his career, he has also had the honor of working with incredible luminaries, including Presidents Obama & Biden, the Dalai Lama, David Copperfield, Lady Gaga, and Elton John - who transformed his career when he became the first collector of his fine artwork.

So, please join me in welcoming Jon Carmichael!
