

**Dr. Aaron E. Carroll** is President & CEO of AcademyHealth. A nationally recognized thought leader, science communicator, pediatrician, and health services researcher, he is a passionate advocate for the creation and use of evidence to improve health and health care for all.

Before joining AcademyHealth, Dr. Carroll was a Distinguished Professor of Pediatrics and Chief Health Officer at Indiana University, where he also served as Associate Dean for Research Mentoring and the director of the Center for Pediatric and Adolescent Comparative Effectiveness Research at Indiana University School of Medicine. He earned a B.A. in chemistry from Amherst College, an MD from the University of Pennsylvania School of Medicine, and an M.S. in health services from the University of Washington School of Public Health, where he was also a Robert Wood Johnson Clinical Scholar.

Dr. Carroll's research focused on the study of information technology to improve pediatric care, decision analysis, and areas of health policy including cost-effectiveness of care and health care financing reform. He is the author of *The Bad Food Bible* and the co-author of three additional books on medical myths. In addition to having been a regular contributor to *The New York Times* and *The Atlantic*, he has written for many other major media outlets and is co-Editor-in-Chief at *The Incidental Economist*, an evidence-based health policy blog. He also has a popular YouTube channel and podcast called *Healthcare Triage*, where he talks about health research and health policy.

## Testimonials

This is a testimonial message from eBiz

- ebiz solutions, Project Manager.

"Dr. Aaron Carroll was fresh, insightful and engaging. Dr. Carroll is genuine storyteller who connected with our audience from start to finish. Our audience of healthcare professionals were taken behind the scenes of the crisis and condition of healthcare as it impacts nations around world, and were presented with staggering statistics and data as to where our nation ranks, and what we need to do collectively to improve the health and wellness of Americans. We walked away with a better understanding of what needs to be done from an IT and research perspective, how it needs to be done, and the steps medical professionals need to take to enhance the quality of care Americans receive. Dr. Carroll was top notch from start to finish."
